Dr. MAGNETTO

Biological action

Benefits

- People believe that if we eat good food, take good medicines and better supplements, we will remain healthy. This is true but at the same time we should understand how important the role of magnetic field is in staying healthy. If the magnetic field above the earth stops working, then life on this earth will end.
- That is why we can say that magnetic field is life force, magnetic field is life. In simple words, if our body does not get the required magnetic field, then the body cannot survive. That is why when the body starts getting magnetic field to survive, then the cells of the blood flowing in our body stick together, as soon as it gets magnetic field, it gets affected due to the presence of an element called iron in our blood and our cells which were stuck together, start moving smoothly.
- Air, water, food and exercise are the basic pillars of our body. If magnetic field is not available then all these pillars will also be shaken, therefore for our good health, this magnetic field of the fifth pillar is necessary.
- Prevention of fluctuations in blood circulation.
- Absorbs glucose and fatty acids and converts them into high energy.
- Helps in male and female infertility problems.
- Helps in preventing and recovering from cancer.
- Helps prevent and recover from Parkinson's.
- Helps in reducing asthma. Increases immunity.
- Improves body flexibility. Increases sex power.
- Reduce inflammation. Induces good deep sleep.

* The Two Unity Energy watch is fitted with very small nanotechnology magnets that increase our energy levels.

Benefits:

- Wearing this watch on the wrist increases our energy level, protects us from mobile radiation. Immunity power increases. Our blood contains iron which gets affected by wearing this watch. Our blood cells are stuck together, as soon as we wear this watch, the blood cells separate and start flowing properly. Because as soon as we wear this watch, they start getting the power of energy. - One is stress and the other is negative thinking. When a person lives in negative thinking like stress, then many such changes take place in the body whose effect becomes negative. Due to stress the energy in the body becomes low, due to low energy one feels tired, due to feeling tired there is stiffness and pain and in this way a person gradually starts becoming a victim of disease. So that is why it has been seen that stress is the biggest reason for increase in diseases. Stress runs parallel with our thoughts and that is we are living inside more than 700 types of radiations. Like electromagnetic frequency, there are different types of radiations.
- Unity Energy Technology which is a very miracle technology, this science which is Unity Energy Science is such an important science that it affects the fundamental structure of our body like you can see how our body is made, you know that our body is made of cells.
